## The Company

AFE is a leading international fire engineering company specialising in high fire risk industries including oil, gas, petrochemical, marine, aviation, and power generation.

The company's traditions go back over two hundred years as part of Angus Fire, which in turn is part of Kidde plc, the world's largest group of fire protection companies.

AFE has unrivalled experience in major fire engineering projects and has secured contracts in over one hundred countries with the world's leading contractors.

AFE is committed to responsible environmental practice and uses the most effective and environmentally safe extinguishing agents.

## Capabilities

The unique strength of AFE lies in its ability to work alongside its clients to provide tailor-made systems to specification, on time and within budget.

AFE offers a total capability approach to fire and gas protection and detection system packages.

This includes:

- Surveys
- Consultancy
- Project Management
- Design and Engineering
- Documentation
- Procurement
- Equipment Supply
- Fire testing
- Installation
- Commissioning
- Maintenance

## Products

A comprehensive product range covers all aspects of fire protection systems and equipment:

- Foam systems
- Foam induction skids
- Foam concentrates
- Monitors
  - Foam and water
  - Manual
  - Remote controlled
  - Portable
- Waterspray systems
- Deluge valve skids
- Sprinkler systems
- Gas Systems
  - CO<sub>2</sub>
  - FM200
  - Argonite
- Dry chemical systems
- Waterway fittings
- Foam water nozzles
- Fire hose
- Hose station cabinets
- Extinguishers
  - Portable
  - Wheeled
- Hydrants and fittings
- Detection, alarm and control systems

## Systems

Fully qualified designers and project managers at AFE offer an exceptional and extensive depth of technical and hands on experience.

All systems are designed in full compliance with the latest international standards such as NFPA using the latest computer aided design and analysis software.

AFE as a division of Angus Fire has direct access to its manufacturing facilities in order to maintain tight control of quality, lead times and cost.

As part of Kidde plc, AFE works in close co-operation with the world's leading fire protection and detection equipment manufacturers.

## Quality

Continuous commitment to achieving the highest levels of quality in all its products and services is an integral part of AFE company policy.

All activities including design, supply, installation and servicing are carried out in a BS EN ISO certified environment to ensure a consistently high level of quality and reliability.

Regular quality audits are carried out to ensure that the company's documented system is maintained to the highest standards.

## Global Presence

AFE undertakes projects worldwide, from its UK operations and has support offices based in Dubai, Singapore and Houston.

Project support facilities are also maintained through an extensive network of distributors in over one hundred countries throughout Europe, Africa, the Arabian Gulf, Asia, South America, and the Caribbean.

Head Office

## Location

All design, engineering, documentation, procurement and project management activities are carried out at AFE's operational headquarters near Oxford and its manufacturing site near Lancaster in the UK.
